Committee Report

The committee reports a fairly successful season. Compared with last years results in this direction, this years efforts suffer in comparison, however a better idea can be obtained of what has been accomplished when we consider, that a mere handful of members increased the Clubs membership by 29 new names.

This gain was divided amongst the following classes of membership.

Active	Members	10
Junior	"	5
Associate	"	14
		29 New members

The following contributed to the fairly good showing.

W. Olsgard 9BTK	5 new members
E. Nickel 9HTO	5 " "
H.L.S. Baird 9HO	4 " "
F. Catel 9DTK	2 " "
C. Polachek Ex 9CHP	2 " "
J. Meyer 9BKR	3 " "
	21 " "

The remaining 8 new members being distributed amongst individual club members.

We feel that the club as a whole should interest itself more in increasing the membership. The successful club is always a club that keeps up an active interest in finding new members.

We should all be interested, and on the lookout for good material at all times,

best results can be obtained by boosting the Club whenever we get the opportunity. Let every member put his shoulder to the wheel, and we'll establish our rights to call ourselves The foremost purely Amateur Radio Club in the World.

The season of 1925-1926 promises to be a bigger, and better season than ever before.

Now then! here's our goal, and our slogan for 1925-1926

Two new members for every active member in the club.

Its not impossible! Lets go.
